Earnings calls summary: Management’s next moves

H1 → Q3 2026 | Selected forward-looking signals from management remarks and Q&A

Q3 clarifies partner choices, combination rationale and pre-LOE formulation plans; several platform commitments are reinforced.

Priority	H1 baseline	Q3 signal / next development step	Evidence
ADC–IO combinations	IO–ADC combinations already central to the strategy.	Add ivonescimab combinations with sone-ve / Datroway; GI trials expected imminently. Internal rilvegostomig / volrustomig remain in development, with first Phase III readouts expected H2 2027.	**Partner mix expanded** Q3 P025–31, P077 [E01]
EGFR franchise	Tagrisso + Orpathys / Datroway across treatment lines.	“starting with Tagrisso and staying with Tagrisso”: use portfolio combinations through progression. TROPION-Lung14 / 15 target Datroway + Tagrisso in first- / second-line settings.	**Sequencing clarified** Q3 Q&A P185–87 [E02]
CVRM combinations	Oral combinations and laroprovstat / rosuvastatin already discussed.	PCSK9 + statin and oral GLP-1 + SGLT2 address co-morbid disease drivers. Laroprovstat / rosuvastatin Phase III data expected in 2027; GLP-1 + PCSK9 is potential interest, not a stated trial start.	**Rationale / status clarified** Q3 P098; Q&A P263–71 [E03]
Formulation & lifecycle	No explicit Imfinzi SC launch-before-LOE statement identified.	Imfinzi subcutaneous is progressing; management expects launch before Imfinzi LOE, with particular value as use expands into earlier settings. No calendar launch date was given.	**Explicit in Q3 vs supplied H1** Q3 Q&A P171 [E04]
Cell therapy & TCEs	Autoimmune, off-the-shelf and in-vivo investment already described.	AZD0120 / surovatamig pivotal and early autoimmune programmes advance. CEO reiterates investment and speed in in-vivo cell therapy; no candidate-specific stage or timing was stated.	**Commitment reinforced** Q3 P032–33; Q&A P278,310 [E05]
Cancer vaccines	No cancer-vaccine strategy identified in supplied H1 transcript.	Asked about personalized cancer vaccines and partnering, CEO says “for now” the approach is internal development, leveraging infectious-disease capabilities. No modality, clinical stage or firm timeline disclosed.	**Explicit in Q3 vs supplied H1** Q3 Q&A P129–34 [E06]

Read-through: distinguish stated development plans from exploratory interest. “Not identified in H1” refers only to the supplied transcript; it does not establish first disclosure.
